Project Bridge

Should Ditto(by Finshots) combine with CoverGrid — and on whose terms?

Close | Month 18 | Year 3

At close · 60%

Control from day one, founders holding 40% and still leading.

OUR RECOMMENDATION

Acquire 60% of CoverGrid now, on a contracted path to 100% by Year 3.

ACQUIRE, NOT MERGE

We reject the proposed terms.

640 employer clients

~2 lakh employees reached

74 vs 42 NPS · Ditto vs CG

Ditto should acquire 60% of CoverGrid now, with a contracted path to 100% by Year 3 — not merge on the proposed terms.

We recommend control, but for a defensive reason: the workplace funnel can be rented through a partnership. Ditto's trust asset can only be protected through ownership.

TERM	COVERGRID PROPOSED	WE RECOMMEND
Structure	Merger; CG holders take 30% of the combined entity	Acquire **60% of CoverGrid**, retained as a ring-fenced subsidiary
Consideration	30% equity + ₹25cr cash	**₹25cr cash accepted in full**, balance in Ditto equity; CG's ₹28cr debt stays with CoverGrid
Remaining 40%	Not addressed	**20% at M18, 20% at Year 3.** Purchase mandatory by Year 3; price varies with performance
Exit certainty	Illiquid 30% minority	**Mutual put and call** — CG holders can compel purchase from Year 3 at fair value with a floor
Founders	Lead the division for 3 years	**3 years retained**, final tranche conditional on completing term and clearing the quality gate
Brand	CoverGrid retired at 18 months	**"CoverGrid, a Ditto company"** — retirement gated on NPS and retention, 18-month floor / 36-month backstop

The deal is not the question. The structure is.

The strategic logic is sound and precedented. The terms are not — 100% of the brand risk to Ditto, a blocking stake to CoverGrid's holders, for a business whose NPS is already falling.

The workplace-to-retail thesis is proven — but it takes five to seven years, not three.

Three institutions have executed this exact trade. All three worked. None worked quickly.

① PRECEDENT · THE TWIN

Financial Engines + Edelman (2018)

Scale without economics — **10mn+ employees, $169bn AUM**, earning **0.2–0.6%** — bought the trusted retail brand for **$3.02bn**.

3% workplace 75% retail

Same market, same 14 months.

② PRECEDENT · THE MECHANISM

Morgan Stanley + E*TRADE / Solium (2019–20)

Bought workplace stock-plan platforms, then converted at one trigger moment — **equity vesting**.

$400bn

moved from workplace channels into full-service advisors since 2020.

③ PRECEDENT · THE TIMELINE

Empower + Personal Capital (2020)

A recordkeeper — **$656bn, 9.7mn participants** — bought a trusted consumer brand.

Four years post-close, the CEO called the consumer wealth business "the first or second inning."

FINANCIAL ENGINES		COVERGRID
Employer-mediated reach	→	640 employers, ~2 lakh employees
Large base, thin economics	→	NPS 42 and declining

EDELMAN		DITTO
Trusted brand, sought out by name	→	NPS 74, 88% policy renewal
Small base, high-quality relationships	→	Retail advisory, 91% employee satisfaction

STATED LIMITATION

No Indian precedent, no disclosed conversion rates. We model conversion as a **range** and test at the lower bound.

We assessed all five options the Board put on the table. Four fail on the Board's own constraints.

The binding constraint is not financial return. It is the first line of the Board's mandate: preserve Ditto's trust-first advisory model.

OPTION	Trust model	Value creation	Customer exp.	Risk profile	Scalability	Verdict
Proceed as proposed	✗	~	✗	✗	✓	REJECT
Strategic partnership	✓	~	~	✓	✗	REJECT
Minority stake	~	~	~	✓	✗	REJECT
Walk away	✓	✗	✓	✓	✗	REJECT
Acquire 60% → 100%	✓	✓	✓	✓	✓	RECOMMEND

Proceed as proposed

30% to CG holders is above the **25% blocking threshold** — a veto for the party whose sales culture Ditto must change. ₹25cr is **60% of the balance**, with no integration budget.

Strategic partnership

Axis Bank wrote **₹12,000cr+ over ten years** at 3–19% ownership — distribution does not need control. But it buys product sales, not a merged advisory relationship.

Minority stake

A partnership's capability ceiling, with capital at risk and still no control over sales practice.

The worst of both structures.

Walk away

Preserves the trust asset, forgoes the channel — while PB Fintech already runs all three. Rejected: the risks here are **structurally mitigable**.

We chose staged control over an earn-out despite the earn-out being cheaper — and the reason is what happens in months 18 to 36.

The proposed terms create a window where CoverGrid's brand is dead, its founders are still in charge, and under an earn-out they would have nothing left to earn.

SCENARIO	Earn-out	Staged
Deal performs	~₹250cr	~₹330cr
Deal underperforms	~₹190cr	~₹210cr

The earn-out is cheaper in both directions. We rejected it anyway for 3 Reasons:

① Legal viability

FEMA Rule 9(6) caps deferred consideration at **25%, for 18 months**, where a non-resident is involved. CoverGrid is venture-backed.

② The incentive dead zone

PERIOD	CG BRAND	FOUNDERS	PULL
M0–18	Alive	Leading	High
M18–36	**Retired**	**Exiting**	**Zero**

Fully paid at M18, still running 640 relationships to M36. Under staged control they hold **40% throughout**.

③ Capital efficiency

On **₹42cr of cash**, buying 60% cuts both cash out and equity issued. Tranches price off **standalone EBITDA**, so conversion revenue is not bought back.

The Quality gate
All four must clear

Free-look cancellation rate	RECORD
IRDAI grievance ratio	RECORD
NPS ≥ 60, independently administered	SURVEY
Employer retention ≥ 90% (a floor)	RECORD

8× gate cleared · **6×** missed (floor)

On ₹20cr EBITDA: ₹32cr or ₹24cr — a **₹16cr swing**. Mandatory by Year 3 either way.

Quality is a gate. Growth is a scaler.

Below the threshold volume is worth zero. And we gate the *price*, not the purchase — a right to decline would trap CG's holders in an illiquid minority.

PRECEDENT · PRUDENTIAL–ASSURANCE IQ

$2.35bn upfront + up to $1.15bn contingent. Targets missed — **the $1.15bn was never paid**.

PRECEDENT · AON–NFP

~54% cash; "NFP, an Aon company" kept permanently; CEO retained. Integration cost **~14% of synergy value**.

PRECEDENT · HDFC LIFE–MAX LIFE

₹850cr non-compete to promoters over four years — the Indian precedent for long founder locks.

Transaction Structuring: Upfront Valuation & Financing Setup

MANDATORY

Baseline Valuation:

CoverGrid's initial Equity Value is pegged at ₹226.0 Cr based on a 15.0x EV/EBITDA multiple on its FY26 EBITDA (₹16.0 Cr), adjusted for ₹28.0 Cr debt and ₹14.0 Cr cash.

Tranche 1 Stake Acquisition: Ditto acquires a controlling 60% stake for ₹135.6 Cr.

Optimal Day-1 Debt De-leveraging:

CoverGrid Cash Deployment: CoverGrid utilizes ₹8.0 Cr of its ₹14.0 Cr opening cash balance to pay down its high-cost standalone debt from ₹28.0 Cr to ₹20.0 Cr.

Ditto Capital Allocation: Ditto deploys ₹25.0 Cr from its existing cash reserves (leaving a healthy ₹17.0 Cr buffer) and raises ₹110.6 Cr in senior LBO debt(at 10.5% interest rate) to complete the Tranche 1 purchase.

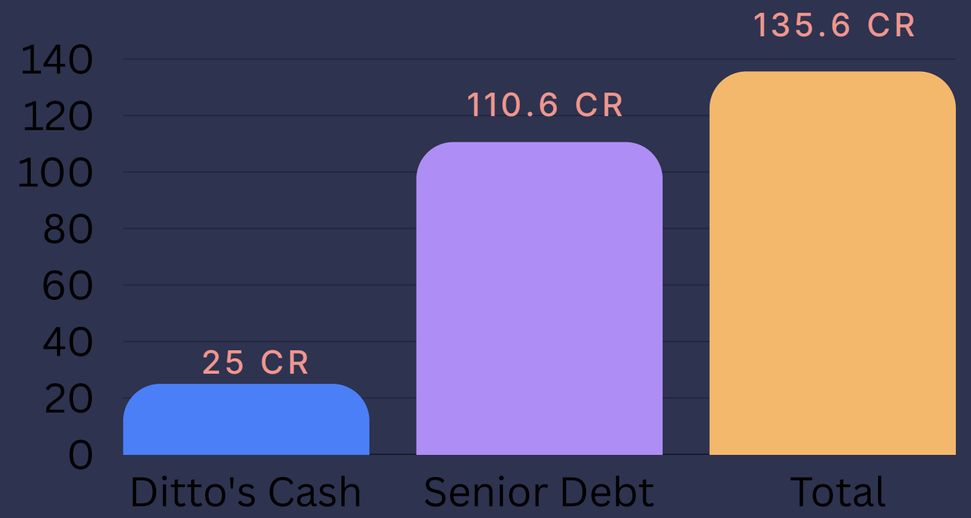

Paying in equity means selling a piece of Ditto.

If Ditto's stock is cheap, Ditto is selling cheap. The number that matters most here is not CoverGrid's valuation — it is Ditto's.

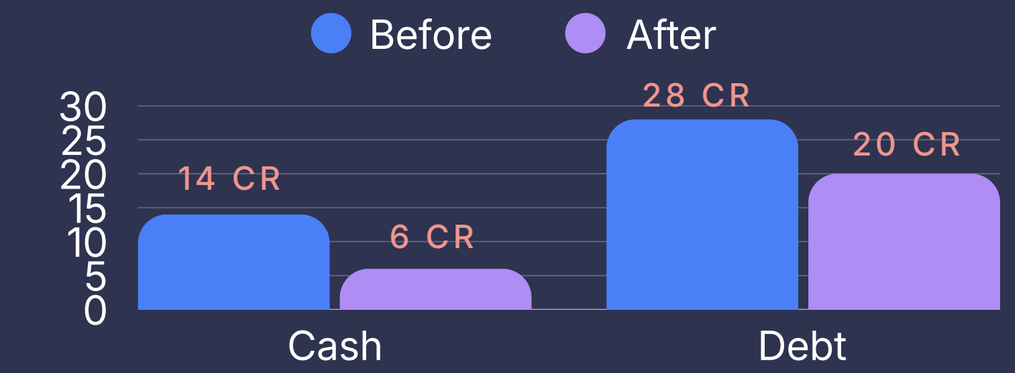

THE PROPOSED TERMS

Assess 30% equity + ₹25cr cash against the concluded range. One sentence, one number.

COVERGRID 60% STAKE BREAKDOWN

COVERGRID DEBT & CASH RESTRUCTURING ON DAY 1

Synergy Unlocking & Combined Revenue / EBITDA Expansion

Cross Selling Revenue Acceleration:

Integrating Ditto's D2C retail stack with CoverGrid's B2B reach generates cross-sell revenue scaling from ₹7.0 Cr (FY27) to ₹28.0 Cr (FY31).

Customer Retention & NPS Recovery:

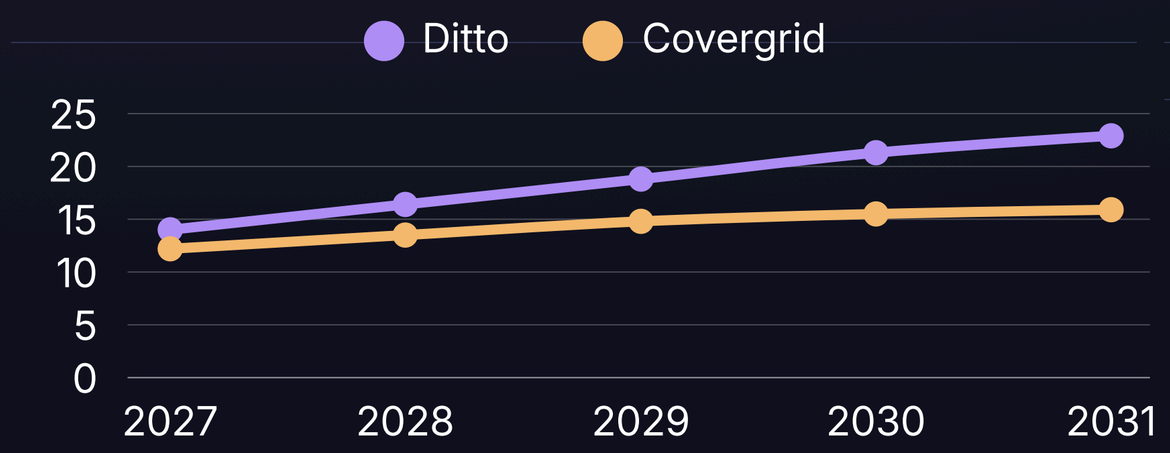

Restructuring CoverGrid's customer service engine improves NPS, unlocking retention revenue synergies scaling from ₹10.0 Cr (FY27) to ₹118.4 Cr (FY31).

Margin Expansion:

Ditto: EBITDA margin (including synergies) expands from 7.4% (FY26) to 22.9% (FY31).

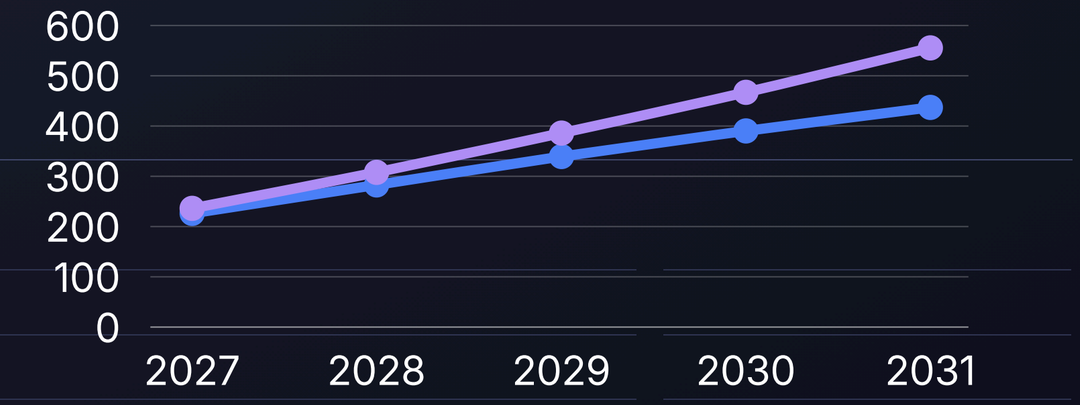

CoverGrid: EBITDA margin expands from 9.2% (FY26) to 15.9% (FY31).

EBITDA MARGIN (IN % OF REVENUE)

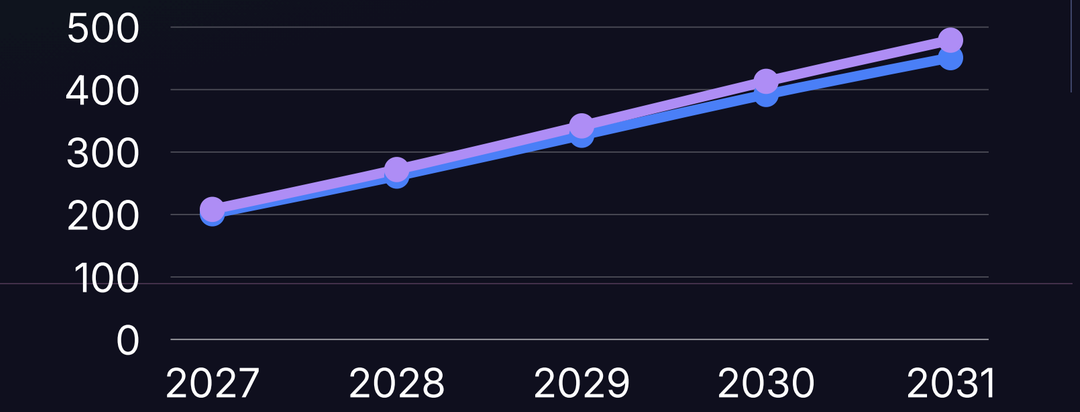

REVENUE BEFORE AND AFTER SYNERGY (IN CRORES)

COVERGRID

DITTO

60-20-20 Staged Acquisition & Valuation Progression

Staged Equity Buyout: Value Creation & Performance-Linked Outflows

Value Accretion Mechanics:

Subsequent 20% equity purchases are tied to performance-driven Fair Market Value (FMV) at a constant 15.0x EV/EBITDA multiple.

Tranche 2 (Month 18 / FY28):

EBITDA Base: Reaches ₹35.2 Cr.

CoverGrid De-leveraging: Standalone debt drops to ₹4.0 Cr with cash balance at ₹7.94 Cr.

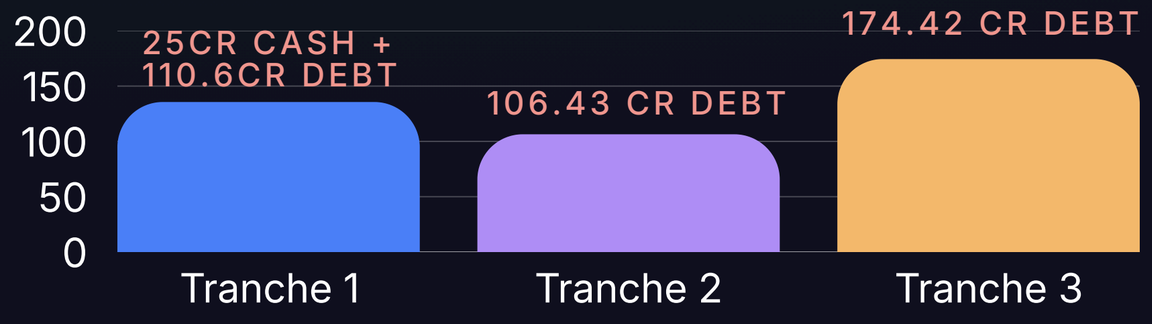

Valuation & Outflow: Equity value scales to ₹532.13 Cr; 20% buyout requires ₹106.43 Cr.

Tranche 3 (Year 3 / FY29):

EBITDA Base: Reaches ₹57.2 Cr.

Balance Sheet Health: Standalone debt fully paid off to ₹0.0 Cr; cash balance reaches ₹14.06 Cr.

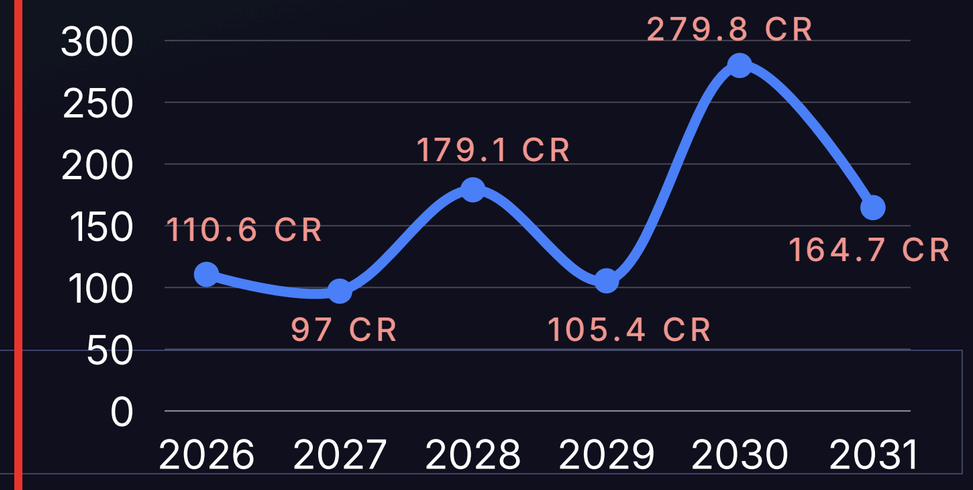

Valuation & Outflow: Equity value scales to ₹872.09 Cr; final 20% buyout requires ₹174.42 Cr

COVERGRID'S DEBT

DITTO'S DEBT

Dividend Upstream, LBO Debt Servicing & Cash Liquidity

Cash Flow Waterfall: Dividend Extraction & De-leveraging Proof

CoverGrid Debt Repayment Speed:

CoverGrid completely repays its remaining ₹20.0 Cr standalone debt within 2 years (₹16.0 Cr in FY27, ₹4.0 Cr in FY28).

Upstream Dividend Capacity:

Post-debt clearance, CoverGrid distributes dividends to Ditto starting at a 50% payout ratio (₹16.24 Cr in FY28), stepping up to 75% in FY29 (₹42.19 Cr) and 80% in FY31 (₹62.68 Cr).

LBO Debt Amortization:

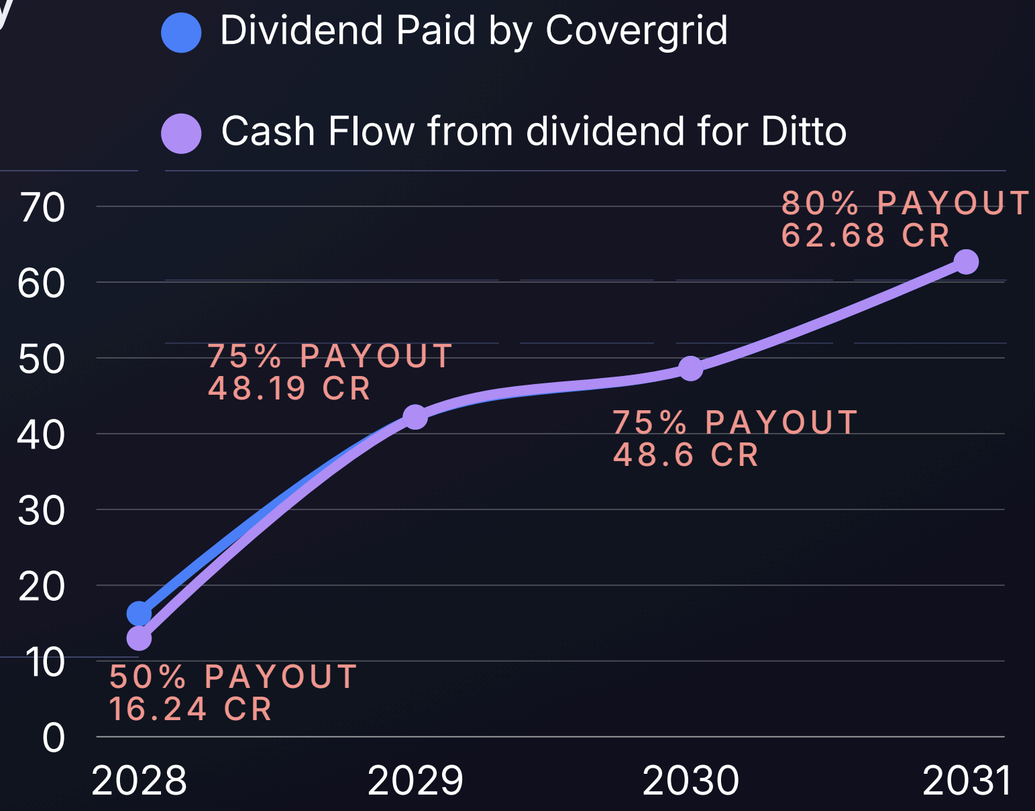

Ditto leverages upstream dividend inflows alongside internal accruals to service its principal repayments.

Maintains a strict ₹15.0 Cr minimum cash buffer on Ditto's Balance Sheet across all forecast years.

Estimated Time to Reach Zero for Ditto:

At the projected FY31 principal repayment rate of ~₹115.1 Cr per year (supported by increasing upstream dividends of ₹62.7 Cr+ and Ditto's standalone Net Income of ₹52.4 Cr), the remaining ₹164.7 Cr balance will take approximately 1.5 more years past March 2031.

Total Time Required for Ditto: ~6.5 Years from Day 1 (Fully paid off by mid-FY33 / late 2032).

Entity	Starting Debt	Year Debt Reaches ₹0.0 Cr	Total Years Required
CoverGrid Debt	₹20.0 Cr	March 2028 (FY28)	2 Years
Ditto LBO Debt	₹110.6 Cr	Mid-FY33 (Late 2032)	~6.5 Years

Two IRDAI registrations, one data firewall — and the people who staff it

Corporate structure defines data ownership. Employee consent governs data access. Integration preserves customer trust.

A · THE LICENSING CONSTRAINT

Ditto and CoverGrid remain separately licensed entities. Their respective regulatory responsibilities should be defined before closing.

PRECEDENT · PLUM

Plum transitioned from a corporate-agent model to a broker licence to address similar distribution constraints, but faced higher insurer-level compliance requirements and a ₹5 crore sum-insured limitation.

B · THE MITIGATION PATH

Maintain separate operating and data boundaries. Ditto manages personal insurance advisory; CoverGrid retains employer relationships and benefits.

THE RING-FENCE

Ditto
Personal advisory

CoverGrid
Employer benefits

CONSENT GATE · CROSSES ON OPT-IN

C · THE CONSENT ARCHITECTURE

ENROLMENT · STEP 4 OF 4

Would you like independent advice on your personal cover?

☐ Yes — share my name and cover details with Ditto so an advisor can review the gap between my group cover and my needs.

Your employer does not see your answer. You can withdraw at any time in one tap.

Continue | Skip

CONSENT REQUIREMENT

Personal insurance advisory is a distinct purpose requiring separate, specific employee consent. Consent must be voluntary, informed and independently withdrawable.

D · PAIRED TEAMS — NOT ORGANISATIONAL ABSORPTION

CoverGrid retains employer-facing expertise, while Ditto provides advisory, technology and compliance capabilities. Key customer journeys are jointly managed by a CoverGrid specialist and a Ditto specialist.

E · CLARITY CHECK BY DITTO

A new, standalone advisory product created for CoverGrid employees — providing an independent review of personal insurance needs before any product recommendation.

PRECEDENT · PERSONIFY HEALTH

Created a new combined platform and brand to bring the two businesses together while maintaining continuity for existing customers.

NOT PERMITTED

✗ Bundled consent
✗ Pre-ticked consent
✗ Employer consent substituted for employee consen

Cross-sell begins on Day 1 — but trust remains the primary objective

Ditto and CoverGrid share the same revenue model — both are paid commissions by insurers. Selling starts with limited weight and increases only as customer trust is proven.

PRECEDENT
Wells Fargo

- **~5,300** dismissals
- **$185m** CFPB fine · 2.1mn accounts
- **$1bn → $3bn** subsequent penalties
- **60% → 24%** brand positivity
- **−44%** new checking accounts YoY

A · THE INCENTIVE DESIGN

	Clarity Check	Clarity Advisory
Phase	**M0–6**	**M6+**
Trust / quality	**85–90%**	**60–65%**
Commercial	**10–15%**	**35–40%**

Selling is permitted from Day 1, but commercial incentives remain limited until the NPS threshold is achieved.

B · ADVICE INTEGRITY RATE

Track each advisor's product-recommendation rate against peers. Significant outliers trigger an audit for potential over-selling.

TRUST-BASED INCENTIVES

Commercial incentives increase only after the NPS threshold is achieved and are reduced if trust or advice quality deteriorates.

C · WHEN A RECOMMENDATION IS APPROPRIATE

MAP THE JOURNEY

- **Onboarding** — Initial review of existing cover
- **Annual enrolment** — Employee actively reassesses coverage
- **Claim event** — Coverage need becomes more concrete
- **Job exit / portability** — Cover lapses — highest urgency, lowest friction

Recommendation remains need-based, not volume-based.

D · SYSTEMS SEQUENCING

FIRST	THEN	LAST
CRM and planning platforms merged	Shared customer record and advisory view	Customer-facing experience changes

Precedent · Edelman: CRM integration preceded customer experience changes.
Kotak–ING Vysya: customer-facing integration followed once systems were ready.

CoverGrid's brand retires on a milestone. So does the low-commercial cap on Clarity Check.

Trust is built first; selling and brand integration scale only after it is proven.

APPROACH	PRECEDENT	OUTCOME
Retire both names	BB&T + SunTrust → Truist (2019)	**$125m rebrand. Legacy brands served customers 18–24 months.**
Endorsed, permanent	Aon–NFP (2024)	**"NFP, an Aon company." CEO retained; no forced sunset.**
Both names retained	Edelman Financial Engines (2018)	**Combined identity preserved both brand equities.**

B · INTEGRATION ROADMAP

OUR RECOMMENDATION · ENDORSED + MILESTONE-GATED

"CoverGrid, a Ditto company" from close. Retire the CoverGrid name only after NPS clears the threshold and employer retention is sustained across two renewal cycles.

TWO MILESTONES, ONE TRUST GATE

The same NPS gate increases Clarity's commercial weight from 10–15% to 35–40% at M6. If NPS or Advice Integrity Rate declines, it returns to 10–15%.

Mis-selling liability does not stay with the acquired business, Prudential proved it

PRECEDENT Prudential + Assurance IQ, in sequence

2019
Acquired for **$2.35bn** upfront + up to $1.15bn contingent

2021–23
Goodwill impairments **$1.06bn · $903m · $177m**

12 quarters
Consecutive losses totalling **$381m**

Jan 2023
Ceased reporting Assurance's financials as not significant

May 2024
New sales stopped; wound down in 2–3 months; most staff laid off

Aug 2025
FTC alleged deceptive telemarketing. Assurance IQ paid **$100m**; MediaAlpha $45m. Prudential settled **as guarantor**

> **"It was the CoverGrid division" is not a defence.**
> Prudential wrote off the asset, closed the business, and laid off all the employees, yet it still issued a $100 million cheque in its own name.

PRECEDENT Zenefits — the sector-specific analogue

Commissions were **over 90% of revenue** — CoverGrid's model. California charged it with letting unlicensed employees sell insurance.

$7m	40+	$11m+	$4.5bn → $2bn
California settlement	regulators acted	total actions	valuation cut; CEO surrendered licence

A · THE CONCLUSION FOR DITTO

Tie the precedents back to slide 01: control as defensive necessity, not ambition.

B · DILIGENCE ACTION

Verify all 640 employer relationships are serviced by licensed persons. Name the owner and the deadline.

THE MECHANISM, IN ONE LINE

Volume targets on a trusted brand → mis-selling

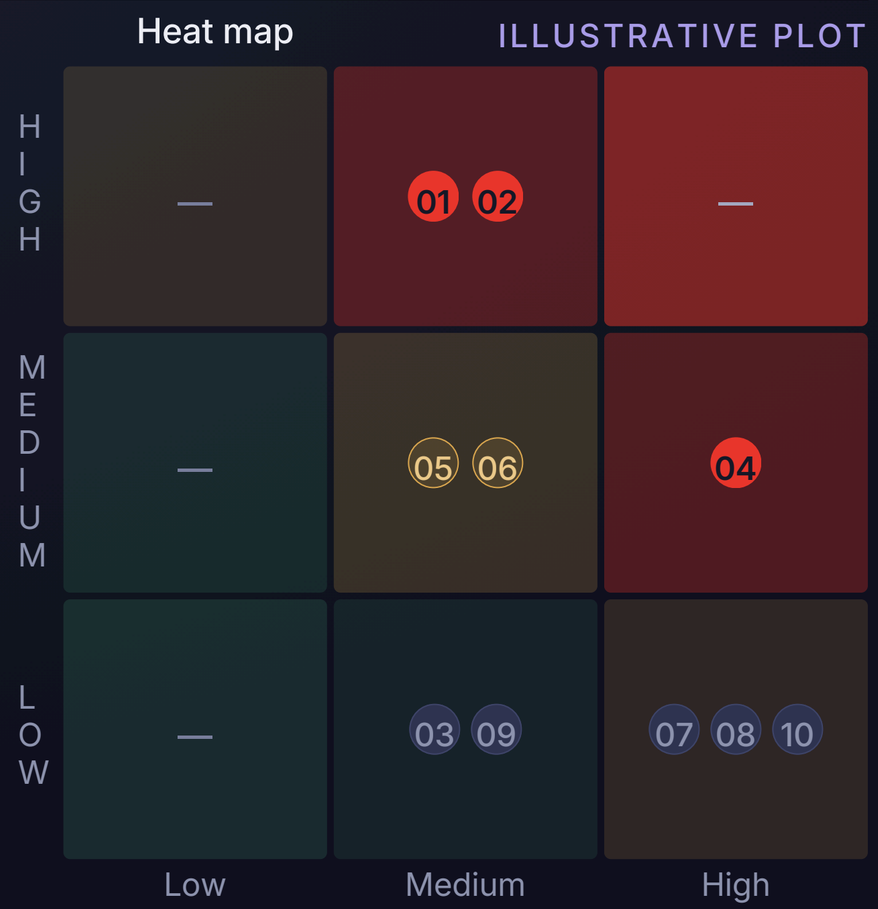

Mis-selling → regulator, not the acquirer, records it

The record follows the parent's name, not the subsidiary's

This is why our quality gate uses free-look and grievance **records**, not surveys.

Every material risk maps to a specific clause in our term sheet

#	RISK	CATEGORY	IMPACT	LIKELY
01	Mis-selling degrades Ditto's NPS	Strategic	High	Medium
02	IRDAI refuses two intermediation registrations in one group	Regulatory	High	Medium
03	DPDP breach on employee data	Regulatory	Low	Medium
04	Conversion undershoots the model	Financial	Medium	High
05	Founder departure at Year 3 destabilises 640 relationships	Operational	Medium	Medium
06	Cultural incompatibility	Cultural	Medium	Medium
07	Balance-sheet thinness post-close	Financial	Low	High
08	Blocking stake grants CoverGrid a veto	Governance	Low	High
09	Overpaying for Ditto-created value	Financial	Low	Medium
10	Ditto under-resources the division, then withholds the tranche	Governance	Low	High

MITIGATION COLUMN

1. Brand dilution: CoverGrid’s brand or reputation could be negatively affected after the merger.
2. Conversion thesis doesn’t materialise: The expected increase in customer conversions or revenue may not happen as projected.

Conditions precedent, walk-away triggers, and what we still need to know.

Deals die on structure, not strategy. HDFC Life–Max Life was strategically sound and legally impossible.

A · Conditions precedent

01 IRDAI approval for change of control of an insurance intermediary

02 Written clarity on the group's intermediation registration

03 Shareholder residency status, does FEMA Rule 9(6) constrain deferred consideration?

04 CCI notification, de minimis exemption, given ₹174cr revenue

05 Licensing audit of all customer facing CoverGrid personnel

06 Confirmation of the ₹28cr balance sheet line, assumed to be debt

"We checked and it is exempt" beats silence.

B · WALK-AWAY TRIGGERS

Three or four conditions under which Ditto abandons the transaction, each testable.

PRECEDENT · HDFC LIFE–MAX LIFE (2016)

Blocked under **Section 35, Insurance Act 1938** — the merger was with a non-insurance holding company. Any alternative would take **15–20 months** against 4–5 for an IPO.

PRECEDENT · IDFC–SHRIRAM

Collapsed purely over the swap ratio.

C · Documentation architecture

Share Purchase Agmt	Shareholders' Agmt
Amended Articles	Retention · non-compete
Data processing	Indemnity escrow

SHA terms must sit in the Articles or they may be unenforceable, verify with counsel.

D · Stated limitations of our analysis

No Indian precedent for this combination. The closest evidence is American and ignores India's licensing regime.

No Indian player discloses group-to-retail conversion; it is modelled as a range.

CoverGrid is fictional — every assumption is tagged to a named comparable.

The Edelman segment figures are directional, not measured.

Acquire 60%. Contract the rest. Gate the price on trust.

The channel is worth owning. The brand is worth protecting. Only one structure does both.

Seventeen precedents and comparables behind this recommendation

TRANSACTION	YEAR	TERMS / STRUCTURE	WHY IT IS CITED	SOURCE
Financial Engines + Edelman	2018	$3.22bn; both names retained	Structural twin; 3% vs 75% growth split	Financial Engines + Edelman — SEC 8-K exhibit, deal announcement

Plum (licensing path)	2023–	Corporate agent → broker upgrade	Direct CoverGrid analogue; ₹5cr cover cap	Plum — Plum's own post on the licence upgrade

Full register, the consent flow, and every source cited

ALL OWNERS

COMPLETE RISK REGISTER — WITH MITIGATIONS

10 ROWS

The slide-12 register in full, each risk carrying the clause that mitigates it.

1	Mis-selling degrades Ditto's NPS	Add strict mis-selling checks and make CoverGrid liable for proven cases.
2	IRDAI refuses two intermediation registrations	Make IRDAI approval a condition before completing the deal.
3	DPDP breach on employee data	Conduct a data-security audit and include a data-breach indemnity.
4	Conversion undershoots the model	Link the next payment to achieving agreed conversion targets.
5	Founder departure at Year 3 destabilises 640 relationships	Add a founder retention and transition clause.
6	Cultural incompatibility	Set clear integration rules and conduct regular integration reviews.
7	Balance-sheet thinness post-close	Set a minimum cash reserve and limit additional debt.
8	Blocking stake grants CoverGrid a veto	Limit CoverGrid's veto rights to only major decisions.
9	Overpaying for Ditto-created value	Fix a valuation cap/formula for the remaining 20%.
10	Ditto under-resources the division, then withholds the tranche	Commit minimum funding and link tranche release to agreed milestones.
